**Convenience Translation of the Limited Review Report  
Originally Prepared and Issued in Turkish to English**

To the Board of Directors of Türkiye İhracat Kredi Bankası Anonim Şirketi,

**Report on the Unconsolidated Financial Statements**

We have reviewed the accompanying unconsolidated financial statements of Türkiye İhracat Kredi Bankası Anonim Şirketi ("the Bank") which comprise the unconsolidated balance sheet as at 31 March 2016 and the unconsolidated income statement, unconsolidated statement of income and expense items accounted under shareholders' equity, unconsolidated statement of changes in shareholders' equity, unconsolidated statement of cash flows for the three-month period then ended, and notes, comprising a summary of significant accounting policies and other explanatory information.

*Management's Responsibility for the Unconsolidated Financial Statements*

Management is responsible for the preparation and fair presentation of the financial statements in accordance with the "Banking Regulation and Supervision Agency ("BRSA") Accounting and Reporting Legislation" which includes the "Regulation on Accounting Applications for Banks and Safeguarding of Documents" published in the Official Gazette No.26333 dated 1 November 2006, and other regulations on accounting records of Banks published by Banking Regulation and Supervision Board and circulars and interpretations published by BRSA and the requirements of Turkish Accounting Standard 34 "Interim Financial Reporting" principles for those matters not regulated by the aforementioned legislations. Our responsibility is to express a conclusion on these interim financial statements based on our review.

### *Scope of review*

We conducted our review in accordance with the Standard on Review Engagements (SRE) 2410, "Limited Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of interim financial information consists of making inquiries, primarily of persons responsible for financial reporting process, and applying analytical and other review procedures. A review of interim financial information is substantially less in scope than an independent audit performed in accordance with the Independent Auditing Standards and the objective of which is to express an opinion on the financial statements. Consequently, a review of the interim financial information does not provide assurance that the audit firm will be aware of all significant matters which would have been identified in an audit. Accordingly, we do not express an audit opinion.

### *Conclusion*

Based on our review, nothing has come to our attention that causes us to believe that the accompanying unconsolidated financial information do not give a true view of the financial position of Türkiye İhracat Kredi Bankası Anonim Şirketi as at 31 March 2016 and of the results of its operations and its cash flows for the three-month period then ended in all aspects in accordance with the BRSA Accounting and Reporting Legislation.

### *Report on other legal and regulatory requirements*

Based on our review, nothing has come to our attention that causes us to believe that the financial information provided in the accompanying interim activity report in Section VII, is not consistent with the unconsolidated financial statements and disclosures in all material respects.

**TÜRKİYE İHRACAT KREDİ BANKASI A.Ş.**  
**NOTES TO THE UNCONSOLIDATED FINANCIAL STATEMENTS**  
**FOR THE PERIOD ENDED 31 MARCH 2016**

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

**SECTION ONE**

**GENERAL INFORMATION**

**I. Bank's date of foundation, initial status, history regarding the changes in this status**

Türkiye İhracat Kredi Bankası A.Ş. ("the Bank" or "Eximbank") was established as Turkey's "Official Export Credit Agency" on 25 March 1987 with Act number 3332 as a development and investment bank and accordingly, the Bank does not accept deposits.

**II. Explanation about the Bank's capital structure and shareholders who are in charge of the management and/or auditing of the Bank directly or indirectly, changes in these matters throughout the year (if any) and the group of the Bank**

The total share capital of the Bank is TL 2.500.000.000 (two billion and five-hundred million). The Bank's paid-in-capital committed by the Republic of Turkey Prime Ministry Undersecretariat of Treasury ("the Turkish Treasury") consists of 2.500.000.000 shares of TL 1 nominal each.

The Bank decided to increase its capital to TL 3.700.000 at Ordinary General Assembly dated 22 March 2016. Total capital increase is amount to TL 1.200.000 and TL 599.657 of this increase is funded from inflation adjustment difference, TL 439.790 is funded from reserves that has been transferred from 2015 profit, TL 160.542 is funded from reserves and TL 11 is funded from prior year's undistributed income. The capital increase is completed on 2 May 2016 based on BRSA's permission which is dated 28 April 2016.

**III. Explanation on the Board of directors, members of the audit committee, president and executive vice presidents and their shareholding at the Bank, if applicable**

**NOTES TO THE UNCONSOLIDATED FINANCIAL STATEMENTS**  
**FOR THE PERIOD ENDED 31 MARCH 2016**

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

**SECTION ONE (Continued)**

**GENERAL INFORMATION (Continued)**

**III. Explanation on the Board of directors, members of the audit committee, president and executive vice presidents and their shareholding at the Bank, if applicable (continued)**

General Manager of the Bank is Dr. Hayrettin KAPLAN, Deputy General Manager responsible for Loans of the Bank is Mesut GÜRSOY, Deputy General Manager responsible for Accounting Transactions and Reporting, Information Technologies and Economic Research is Necati YENİARAS (Coordination/Technology), Deputy General Manager responsible for Social Affairs and Communication, Human Resources and Board of Examination of the Bank is Ahmet KOPAR (Technology/Support), Deputy General Manager responsible for Insurance and Guarantee Operations of the Bank is Enis GÜLTEKİN, Deputy General Manager responsible for International Loans of the Bank is Alaaddin METİN and Deputy General Manager responsible for Risk Analysis and Assessment, Finance and Treasury Operations of the Bank is Mustafa Ertan TANRIYAKUL.

The Bank's chairman and members of the board of directors, the members of the audit committee, general manager and deputy general managers do not own shares of the Bank.

**IV. Information on the shareholders owning control shares**

Name/Commercial title	Share amount	Share percentage	Paid-in capital	Unpaid portion
The Turkish Treasury	All	100%	2.500.000	-

**V. Brief information on the Bank's service type and fields of operation**

The Bank has been founded to support the development of export, venture investments, foreign trade through diversification of the exported goods and services, by increasing the share of exporters and entrepreneurs in international trade, to encourage foreign investments and production and sales of foreign currency earning commodities and to create new markets for the exported commodities, to provide exporters and overseas contractors with support to increase their competitiveness.

As a means of aiding export development services, the Bank performs loan, guarantee and insurance services in order to financially support export and foreign currency earning services. While performing the above mentioned operations, in addition to its own equity, the Bank provides short, medium or long term, domestic and foreign currency lending through borrowings from domestic and foreign money and capital markets.

On the other hand, the Bank also performs fund management (treasury) operations related with its core banking operations. These operations are Turkish Lira and foreign currency capital market operations, Turkish Lira and foreign currency money market operations, foreign currency market operations and derivative transactions, all of which are approved by the Board of Directors. As a result of Decision No. 4106 dated 11 March 2011 of the Banking Regulation and Supervisory Board published in Official Gazette No. 27876, dated 16 March 2011, permission was granted to the Bank to allow it to be engaged in the purchase and sale of foreign exchange-based options. The losses due to the political risks arising on loan, guarantee and insurance operations of the Bank, are transferred to the Turkish Treasury according to article 4/c of Act number 3332 that was appended by Act number 3659 and according to Act regarding the Public Financing and Debt Management, No 4749, dated 28 March 2002. In addition, Banking Regulation and Supervision Agency authorized the Bank to operate in "Purchase and sale of precious metals and stones" and "purchase and sale of the transaction based on the precious metals" on 8 April 2014 and published in the Official Gazette No. 28966 within the scope of paragraphs (h) and (i) paragraph of article number 4 of the Banking Law No. 5411.

**VI. Short explanation about those entities subject to full consolidation or proportionate consolidation with the differences regarding the consolidation transactions performed in accordance with the Communiqué on Preparation of Consolidated Financial Statements of Banks and Turkish Accounting Standards, those deducted from the equities or not included in these three methods**

There are not any transactions of the Bank subject to consolidation.

**VII. Existing or potential, actual or legal barriers for the immediate transfer of equities among the subsidiaries of the Bank or the repayment of debts**

The Bank does not have any subsidiaries.

**TÜRKİYE İHRACAT KREDİ BANKASI A.Ş.**  
**NOTES TO THE UNCONSOLIDATED FINANCIAL STATEMENTS**  
**FOR THE PERIOD ENDED 31 MARCH 2016**

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

**SECTION THREE**

**ACCOUNTING POLICIES**

**I. Basis of presentation**

**1. The preparation of the financial statements and related notes and explanations in accordance with the Turkish Accounting Standards and Regulation on the Accounting Applications for Banks and Safeguarding of Documents**

The Bank prepares its financial statements and underlying documents in accordance with the “Regulation on Accounting Applications for Banks and Safeguarding of Documents” and other regulations, explanations and circulars on accounting and financial reporting principles announced by the Banking Regulation and Supervision Agency (“BRSA”) and Turkish Accounting Standards (“TAS”) published by Public Oversight Accounting and Auditing Standards Authority (“POA”).

Accounting policies applied and valuation methods used in the preparation of the unconsolidated financial statements are expressed in detail below.

Amounts in the financial statements and related explanations and disclosures are expressed in thousands of Turkish Lira (“TL”) unless otherwise stated.

The financial statements are prepared as Turkish Lira (“TL”) in accordance with the historical cost basis except for the financial assets at fair value through profit or loss, available-for-sale financial assets whose fair value can be reliably measured, derivative financial assets and liabilities held for trading purpose and derivative financial assets and liabilities held for cash flow hedges.

The preparation of the unconsolidated financial statements in conformity with TAS requires the Bank management to use of certain make assumptions and estimates on the assets and liabilities of the balance sheet and contingent issues as of the balance sheet date. These estimates are reviewed regularly and, when necessary, corrections are made and the effects of these corrections are reflected to the income statement.

**2. Accounting policies and valuation principles applied in the preparation of the financial statements**

The accounting policies and valuation principles applied in the preparation of the financial statements are determined and applied in accordance with the principles of TAS. These accounting policies and valuation principles are explained in Notes II to XXII below.

**3. Additional paragraph for convenience translation to English**

The differences between accounting principles, as described in the preceding paragraphs, and the accounting principles generally accepted in countries, in which the accompanying financial statements are to be distributed, and International Financial Reporting Standards (“IFRS”), may have significant influence on the accompanying financial statements. Accordingly, the accompanying financial statements are not intended to present the financial position and results of operations in accordance with the accounting principles generally accepted in such countries and IFRS.

**II. Explanations on strategy of using financial instruments and explanations on foreign currency transactions**

The Bank uses derivatives to balance its foreign currency asset/liability positions for managing its exposure to currency risk.

Foreign currency denominated monetary assets and liabilities are translated with the exchange rates of the Bank prevailing at the balance sheet date. Gains and losses arising from such transactions are recognized in the income statement under the account of “foreign exchange gains/losses”.

As of 31 March 2016, the exchange rates used in translation of foreign currency denominated balances into Turkish Lira are TL 2,8299 for US dollar, TL 3,2088 for Euro, TL 2,5166 for 100 JPY and TL 4,0575 for GBP.

**TÜRKİYE İHRACAT KREDİ BANKASI A.Ş.**  
**NOTES TO THE UNCONSOLIDATED FINANCIAL STATEMENTS**  
**FOR THE PERIOD ENDED 31 MARCH 2016**

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (Continued)**

**III. Explanations on forward transactions, options and derivative instruments**

The Bank uses derivative financial instruments in order to avoid exposure to foreign currency and interest rate risks.

As of the balance sheet date, there are outstanding currency and interest rate swap purchase and sales contracts and forward transactions in TL and foreign currency.

Derivatives are initially recorded with their fair values and related transaction costs as of the contract date are recorded in profit or loss. The following periods of initial reporting, they are measured with their fair values. The result of this assessment, offsetting debit and credits stemming from each contract debit and credits are reflected to the financial statements as a contract-based single asset and liability. The method of accounting gain or loss changes according to related derivative transaction whether to be held for cash flow hedges or not and to the content of hedge account.

The Bank notifies in written the relationship between hedging instrument and related account, risk management aims of hedge and strategies and the methods using to measure of the hedge effectiveness. The Bank evaluates the method of hedge whether to be effective on the expected changes in fair values in this process or not or each result of hedge effectiveness whether to be between the range of 80% and 125%.

Changes in fair values of derivative transactions under fair value hedges are recorded in profit or loss together with changes in hedging asset or liability. The difference in current values of derivative transactions fair value hedge is shown in "Trading Gains/Losses on derivative financial instruments" account. In the balance sheet, change in fair value of hedge asset or liability during the hedge accounting to be effective is shown with the related asset or liability. In case of inferring hedge accounting, corrections made to the value of hedge account using straight-line amortization method within the days to maturity are reflected to "Trading gains/losses on derivative financial instruments" account in the income statement.

The Bank is protected from cash flow risk arising from floating-rate liabilities in foreign currency and TL by cross-currency swaps. In this context, the fair value changes of the effective portion of the hedging instruments are accounted under the "hedge funds" account within equity. In the period in which the cash flows affect the income statement for the hedged item, the hedging instrument relating to the profit / loss extracted from equity and recognized in the income statement.

In cash flow hedge accounting, if it is not continued to hedge because of termination, realization, sale, stop hedging and inefficient hedge effectiveness of hedging instruments, hedge oriented account amounts that realized under shareholders' equity will transferred to profit/loss accounts.

The Bank classifies its derivative instruments except for derivatives held for cash flow hedges as "Held-for-hedging" or "Held-for-trading" in accordance with "Financial Instruments: Turkish Accounting Standard for Recognition and Measurement ("TAS 39")". According to this, certain derivative transactions while providing effective economic hedges under the Bank's risk management position, are recorded under the specific rules of TAS 39 and are treated as derivatives "Held-for-trading".

Payables and receivables arising from the derivative instruments are followed in the off-balance sheet accounts at their contractual values. Derivative instruments are re-measured at fair value after initial recognition. If the fair value of a derivative financial instrument is positive, it is disclosed under the main account "Financial assets at fair value through profit or loss" in "Derivative financial assets held for trading" and if the fair value difference is negative, it is disclosed under "Derivative financial liabilities held for trading". Differences in the fair value of trading derivative instruments are accounted under "trading income/loss" in the income statement. The fair values of the derivative financial instruments are calculated using quoted market prices or by using discounted cash flow models.

**TÜRKİYE İHRACAT KREDİ BANKASI A.Ş.**  
**NOTES TO THE UNCONSOLIDATED FINANCIAL STATEMENTS**  
**FOR THE PERIOD ENDED 31 MARCH 2016**

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (Continued)**

**IV. Explanations on interest income and expense**

Interest income and expenses are recognized in profit or loss on an accrual basis.

The Bank ceases accruing interest income on non-performing loans. Interest income is recorded for non-performing loans when the collection is made.

**V. Explanations on fee and commission income and expenses**

All fees and commission income/expenses are recognized on an accrual basis, except for certain commission income and fees for various banking services which are recorded as income at the time of collection.

**VI. Explanations on financial assets**

The Bank categorizes and recognitions its financial assets as “Fair value through profit/loss”, “Available-for-sale”, “Loans and receivables” or “Held-to-maturity”. The appropriate classification of financial assets of the Bank is determined at the time of purchase by the Bank management, taking into consideration the purpose of holding the investment.

Financial assets at the fair value through profit or loss category have two sub categories: “Trading financial assets” and “Financial assets designated at fair value through profit/loss at initial recognition.”

Trading financial assets are initially recognized at cost. Acquisition and sale transactions of trading financial assets are recognized and derecognized at the settlement date.

The government bonds and treasury bills recognized under trading financial assets which are traded on Borsa İstanbul A.Ş. (“BIST”) are valued with weighted average prices settled on the BIST as of the balance sheet date; and those government bonds and treasury bills traded on the BIST but which are not subject to trading on the BIST as of the balance sheet date are valued with weighted average prices at the latest trading date.

The financial assets classified under trading financial assets and whose fair values cannot be measured reliably are carried at amortized cost using the “effective yield method”. The difference between the purchase cost and the amortized cost at the selling date is recorded as interest income.

If the selling price of a trading financial asset is above its amortized cost as of the sale date, the positive difference between the selling price and the amortized cost is recognized as income under trading gains on securities and if the selling price of a trading security is lower than its amortized cost as of the sale date, the negative difference between the selling price and the amortized cost is recognized as expense under trading losses on securities.

Derivative financial instruments are classified as trading financial assets unless they are designated as hedging instruments. The principles regarding the accounting of derivative financial instruments are explained in detail in Note III of Section Three.

The Bank does not have any financial assets designated as financial assets at fair value through profit or loss.

Held-to-maturity financial assets are assets that are not classified under loans and receivables with fixed maturities and fixed or determinable payments where management has the intent and ability to hold the financial assets to maturity. Loans and receivables are financial assets that are originated by the Bank by providing money, services or goods to borrowers other than trading financial assets and financial assets held for the purpose of short-term profit making. Available for sale financial assets are financial assets other than loans and receivables, held to maturity financial assets and financial assets at fair value through profit or loss. Held-to-maturity financial assets and available-for-sale financial assets are initially recognized at cost.

All regular way purchases and sales of financial assets are recognized and derecognized at the settlement date. The Bank holds Government Bonds, Treasury Bills and foreign currency bonds issued in Turkey and abroad by the Turkish Treasury under the held-to-maturity portfolio.

Held-to-maturity financial assets are initially recognized at cost and are subsequently carried at amortized cost using the effective interest method. Interest earned from held-to-maturity financial assets is recorded as interest income. All regular way purchases and sales of held-to-maturity financial assets are accounted at the settlement date. There are not any financial assets that were previously classified as held-to-maturity but which cannot be subject to this classification for two years due to the contradiction of classification principles.

**TÜRKİYE İHRACAT KREDİ BANKASI A.Ş.**  
**NOTES TO THE UNCONSOLIDATED FINANCIAL STATEMENTS**  
**FOR THE PERIOD ENDED 31 MARCH 2016**

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (Continued)**

**VI. Explanations on financial assets (continued)**

Available-for-sale financial assets are marketable securities other than “Held-to-maturity investments” and “Trading securities”. Available-for-sale financial assets are subsequently re-measured at fair value. Available-for-sale financial assets that do not have a quoted market price in an active market and whose fair value cannot be reliably measured are carried at amortized cost, less provision for impairment.

“Unrealized gains and losses” arising from changes in the fair value of securities classified as available-for-sale are recognized under shareholders’ equity as “Marketable securities value increase fund”, until the collection of the fair value of financial assets, the sale of the financial assets, permanent impairment in the fair values of such assets or the disposal of the financial assets. When these securities are disposed of or the fair value of such securities is collected, the accumulated fair value differences in the shareholders’ equity are reflected to profit or loss.

Bank loans and receivables; consist of other than those, goods or services to be created by the purchase-sale or the financial assets that held for sale in the short term. Bank loans and receivables are initially recognized at cost value. Banks are accounted for at cost-based loans at amortized cost, they are classified as short and long-term loans, open and covered. FX type loans are recognized at fixed prices and are revalued with the Bank’s spot foreign exchange buying rate at the end of the period.

**VII. Explanations on impairment of financial assets**

Financial assets are considered as impaired when the recoverable amount of financial assets, which is calculating expected future cash flows with using “internal rate of return” method, are lower than book value. A provision is made for the diminution in value of the impaired financial asset and this is charged against the income for the year.

The Bank is exempted from the general and specific provisions in accordance with Article 13 “Exceptions” of The Regulation on Principles and Procedures Related to the Determination of the Qualifications of Banks’ Loans and Other Receivables and Provisioning for these Loans and Other Receivables which says specific and general provision rates for transactions made in accordance with Law No: 3332 dated 25 March 1987 are considered as zero percent.

**VIII. Explanations on offsetting financial instruments**

Financial assets and liabilities are offset and the net amount is reported in the balance sheet when the Bank has a legally enforceable right to offset the recognized amounts and there is an intention to collect/pay related financial assets and liabilities on a net basis, or to realize the asset and settle the liability simultaneously. Otherwise, no offsetting is made in relation with the financial assets and liabilities.

**IX. Explanations on sales and repurchase agreements and securities lending transactions**

The Bank does not have any sales and repurchase agreements and securities lending transactions at the balance sheet date.

**X. Explanations on assets held for sale and discontinued operations and explanations on liabilities related with these assets**

Assets which meet the criteria to be classified as held for sale are measured by the book value and no more amortization is made for these assets; and these assets are shown separately on the balance sheet. In order to classify an asset as an asset held for sale, the related asset (or the group of assets to be disposed of) should be able to be sold immediately and the probability of sale for such assets (or group of assets to be disposed of), should be high under current conditions. In order for the sale to be highly probable, a plan should have been made by the suitable management for the sale of the asset (or group of assets to be disposed of) and an active program should have been started to determine the buyers and to carry out the plan.

**TÜRKİYE İHRACAT KREDİ BANKASI A.Ş.**  
**NOTES TO THE UNCONSOLIDATED FINANCIAL STATEMENTS**  
**FOR THE PERIOD ENDED 31 MARCH 2016**

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (Continued)**

**X. Explanations on assets held for sale and discontinued operations and explanations on liabilities related with these assets (continued)**

Furthermore, the asset (or group of assets to be disposed of) should be actively marketed at a price consistent with its fair value. Various events and conditions may extend the period for the completion of the sales process to more than a year. If there is sufficient evidence that the related delay has occurred beyond the Bank's control and that the Bank's plans for selling the related asset (or group of assets to be disposed of) is still in progress, the related assets are continued to be classified as assets held for sale.

A discontinued operation is a division of a bank that is either disposed or held for sale. Results of discontinued operations are included in the income statement separately.

**XI. Explanations on goodwill and other intangible assets**

As of 31 March 2016 and 31 December 2015, the Bank does not have any goodwill in its accompanying financial statements.

Intangible assets consist of computer software licenses. Intangible assets result in net book value as of the balance sheet date by deducting their acquisition cost to accumulated amortization. Intangible assets are amortized by the straight-line method, considering their useful life and amortization rates published by Republic of Turkey Ministry of Finance. During the current year, there has been no change in the depreciation method. The Bank does not expect any changes in accounting estimates, useful lives, depreciation method and residual value during the current and the following periods.

Implemented yearly amortization rates as follows;

Intangible assets : 33%

**XII. Explanations on property and equipment**

All property and equipment are initially recognized at cost. Subsequently property and equipment are carried at cost less accumulated depreciation at the balance sheet date. Depreciation is calculated over the cost of property and equipment using the straight-line method over its estimated useful life. There has been no change in the depreciation method during the current period.

The depreciation rates are as follows;

Buildings : 2%

Furniture, fixtures and vehicles : 6-33%

**TÜRKİYE İHRACAT KREDİ BANKASI A.Ş.**  
**NOTES TO THE UNCONSOLIDATED FINANCIAL STATEMENTS**  
**FOR THE PERIOD ENDED 31 MARCH 2016**

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (Continued)**

**XII. Explanations on property and equipment (continued)**

The depreciation charge for items remaining in property and equipment for less than an accounting period at the balance sheet date is calculated in proportion to the period the item remained in property and equipment. Gains and losses on the disposal of property and equipment are booked to the income statement accounts for the period at an amount equal to the book value. Where the carrying amount of an asset is greater than its estimated "Recoverable amount", it is written down to its "Recoverable amount" and the provision for the diminution in value is charged to the income statement. Expenditures for the repair and renewal of property and equipment are recognized as expense. The capital expenditures made in order to increase the capacity of the tangible asset or to increase the future benefit of the asset are capitalized over the cost of the tangible asset. The capital expenditures include the cost components that increase the useful life, capacity of the asset or quality of the product or that decrease the costs.

There are not any pledges, mortgages or any other contingencies and commitments over property and equipment that restrict their usage. The Bank does not expect any changes in accounting estimates that will have a material impact in future periods in relation with the property and equipment.

**XIII. Explanations on lease**

Assets acquired under finance lease agreements are capitalized at the inception of the lease at the "Lower of the fair value of the leased asset or the present value of the lease instalments that are going to be paid for the leased asset". Leased assets are included in the property and equipment and depreciation is charged on a straight-line basis over the useful life of the asset. If there is any diminution in value of the leased asset, a "Provision for value decrease" is recognized. Liabilities arising from the leasing transactions are included in "Finance lease payables" in the balance sheet. Interest and foreign exchange expenses regarding lease transactions are charged to the income statement. The Bank does not perform financial leasing transactions as a "Lessor".

Transactions regarding operating leases are accounted on an accrual basis in accordance with the terms of the related contracts.

**XIV. Explanations on provisions and contingent liabilities**

Provisions and contingent liabilities except for the specific and general provisions recognized for loans and other receivables are accounted in accordance with "Turkish Accounting Standard for Provisions, Contingent Liabilities and Contingent Assets" ("TAS 37").

Provisions are recognized when the Bank has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made. The provision for contingent liabilities arising from past events should be recognized in the same period of occurrence in accordance with the "Matching principle". When the amount of the obligation cannot be estimated reliably it is considered that a "Contingent" liability exists. When the amount of the obligation can be estimated reliably and when there is a high possibility of an outflow of resources from the Bank, the Bank recognizes a provision for such liability.

As of the balance sheet date, there is not any contingent liability based on past events for which there is a possibility of an outflow of resources and whose obligation can be reliably estimated.

**XV. Explanations on obligations related to employee rights**

Under the Turkish Labor Law, the Bank is required to pay a specific amount to employees who have retired or whose employment is terminated other than for the reasons specified in the Turkish Labor Law.

Obligations related to employee termination and vacation rights are calculated for in accordance with "Turkish Accounting Standard for Employee Benefits" ("TAS 19").

**TÜRKİYE İHRACAT KREDİ BANKASI A.Ş.**  
**NOTES TO THE UNCONSOLIDATED FINANCIAL STATEMENTS**  
**FOR THE PERIOD ENDED 31 MARCH 2016**

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (Continued)**

**XV. Explanations on obligations related to employee rights (continued))**

According laws in force, the Bank is responsible for making a lump sum payment to laid-off workers because of retirement or resignation and behaviours specified in the Labor Law.

Liabilities of severance pay and leave entitlements are calculated by taking into account the provisions of the “Turkey Accounting Standards Related to Employee Benefits” (TAS 19) by the Bank.

Revised TAS 19 are effective being published on the Official Gazette dated 12 March 2013 by Public Oversight Accounting and Auditing Standards Authority. According to revised TAS 19, once the Actuarial Gains and Losses occur, they are recorded under equity and are not associated with the income statement. Benefit costs arising interest cost due to being 1 year more closer to the payment of benefit and service cost as a result of given service by employee are required to be shown in income statement.

	<b>Current Period</b> <b>31.03.2016</b>	<b>Prior Period</b> <b>31.12.2015</b>
Discount ratio	10,65%	10,65%
Inflation	7,65%	7,65%
Salary increase rate	8,65%	8,65%

As of 31 March 2016, the calculated employment termination obligation amounts to TL 16.440. For the period ended 31 March 2016, the Bank also provided a 100% provision for vacation pay liability relating to prior periods amounting to TL 11.770.

For all year long, the Bank has made provision for principally of success fee amounting TL 6.287 to be paid in July 2016, and dividend to personnel, amounting TL 2.522 to be paid in 2017, from 2016 profit.

**XVI. Explanations on taxation**

According to Act number 3332 and article 4/b of Act number 3659, dated 25 March 1987 and 26 September 1990, respectively, the Bank is exempt from Corporate Tax. Due to the 3<sup>rd</sup> Article of the same act; the above mentioned exemption became valid from 1 January 1988. In accordance with clause 9 of the Provisional Article 1 of Corporate Tax Law No. 5520, which states “The provision of Article 35 shall not apply to exemptions, allowances and deductions included in other laws in relation to Corporation Tax prior to the effective date of the Law No. 5520”, the exemption from Corporation Tax continues. Accordingly, deferred tax asset or liability is not recognized in these financial statements.

**XVII. Additional explanations on borrowings**

Trading financial liabilities and derivative instruments are carried at their fair values and other financial liabilities including debt securities issued are carried at “Amortized cost” using the “Effective interest method”.

The Bank has issued three bonds. In October 2011, the Bank issued bonds amounting USD 500 million (TL 1.414.950). The bond is subject to annual fixed interest payment of 5,38% every six months and the total maturity is five years and also, the bond issued on April 2012 with an amount of USD 500 million (TL 1.414.950) is subject to biannual fixed payment of 5.88% and its total maturity is seven years. In addition to this bond, there was a bond increase corresponding to USD 250 million (TL 707.475) as of October 2012 , bond issued on September 2014 with amount of USD 500 million (TL 1.414.950) which is subject to annual fixed interest payment of 5 per cent every six months and the total maturity is seven years and also the bond issued on February 2016 with amount of USD 500 million (TL 1.414.950) which is subject to annual fixed interest payment of 5,38 per cent the total maturity is five years. The Bank applied hedge accounting for the measurement of derivative financial instruments which are related to the bonds issued and accounted for hedge accounting during this period.

Moreover, the Bank has provided fixed rate TL loans that were provided as part of the foreign source FC funds with floating rate of by Rediscount Credit Programs of the CBRT. Hedge accounting has been made to the risk of currency risk as a result of these measurement of derivative transactions was calculated within the scope of hedge accounting was also reflected to the relevant accounts.

**NOTES TO THE UNCONSOLIDATED FINANCIAL STATEMENTS**  
**FOR THE PERIOD ENDED 31 MARCH 2016**

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

---

**SECTION THREE (Continued)**

**ACCOUNTING POLICIES (Continued)**

**XVIII. Explanations on issuance of share certificates**

As the Bank's total paid-in capital is owned by the Turkish Treasury, there is no cost related to share issuance. Profit appropriation of the Bank is resolved at the General Assembly meeting. As of 22 March 2016, dividend distribution for 2015 was approved by Banking Regulation and Supervision Agency.

**XIX. Explanations on avalized drafts and acceptances**

The Bank keeps its guarantee bills and acceptances in the off-balance liabilities.

**XX. Explanations on government grants**

As of the balance sheet date, the Bank does not utilize any government grant.

**XXI. Explanations on segment reporting**

The Bank emphasizes the scope of business method for segment reporting by considering the Bank's main source and character of risks and earnings. The Bank's activities mainly concentrate on corporate and investment banking.

**XXII. Explanations on other issues**

The Bank does not accept deposits. The Bank has been mandated to export loan operations, export loan insurance and export grants. On the other hand, the Bank also performs domestic and foreign currency money capital and FX market operations within the context of Fund management (Treasury) operations.

The Bank engages in derivative transactions, currency and interest rate swaps, forward and option transactions and obtains funds by means of syndicated loans, subordinated loans, bond issuance and bank borrowings.

**SECTION FOUR**

**INFORMATION RELATED TO FINANCIAL POSITION AND RISK MANAGEMENT OF THE BANK**

**I. Information about shareholders' equity items**

Equity and capital adequacy ratio is calculated in the framework of "Regulation on Equities of Banks" and "Regulation on Measurement and Evaluation of Banks' Capital Adequacy".

The Bank's equity in the current period is TL 5.012.427 and capital adequacy ratio is 18,72% as of 31 March 2016. 31 December 2015 calculation is made within the framework of the repealed regulations, equity is TL 4.945.331 and capital adequacy ratio is 18,94%. The Bank's capital adequacy ratio is well over the minimum rate set by the relevant legislation.

(\*)Total capital has been calculated in accordance with the "Regulations regarding to changes on Regulation on Equity of Banks" effective from date 31 March 2016, the information given in the prior period has been calculated pursuant to former regulation.

**II. Currency risk**

**1. If the parent bank is subject to the exchange risk, the effects of such occurrence are estimated and the Board of Directors determines the limits regarding the positions monitored daily**

The Bank's foreign exchange position is followed daily, and the transactions are performed in accordance with the expectations in the market and within the limits determined by the Risk Management Principles approved by the Board of Directors of the Bank.

**2. The scale of the hedging performed through hedge-oriented derivatives for debt instruments in foreign currency and net foreign currency investments**

The basic principle for foreign currency assets and liabilities is to secure a balance between currency type, maturity and interest type. For this purpose, borrowing strategies are determined in accordance with the Bank's asset structure to the extent possible. When this determination is not possible, the Bank aims to change the asset structure or utilize derivative instruments such as "cross currency" (currency and interest) and currency swaps.

**Fair value hedge accounting**

As of the balance sheet date, the Bank uses "Fair Value Hedge Accounting" starting from 1 January 2013.

Financial derivatives which are used for Fair Value Hedge Accounting are cross currency and interest swaps.

	31 March 2016		
	Principal <sup>(1)</sup>	Asset	Liability
<b>Derivative Financial Instruments</b>			
Cross currency swap and interest rate swaps	6.308.792	64.606	29.787
Forward foreign currency buy/sell transactions	9.765.379	302	138.964
<b>Total</b>	<b>16.074.171</b>	<b>64.908</b>	<b>168.751</b>

<sup>(1)</sup> Sum of purchase and sale.

The method of derivatives' fair value measurement shown above is explained in the accounting policy in Section Three No III.

**TÜRKİYE İHRACAT KREDİ BANKASI A.Ş.**  
**NOTES TO THE UNCONSOLIDATED FINANCIAL STATEMENTS**  
**FOR THE PERIOD ENDED 31 MARCH 2016**

(Amounts expressed in thousands of Turkish Lira (TL) unless otherwise stated.)

**SECTION FOUR (Continued)**

**II. Currency risk (Continued)**

**2. The scale of the hedging performed through hedge-oriented derivatives for debt instruments in foreign currency and net foreign currency investments (Continued)**

**Fair value hedge accounting (Continued)**

Starting from 1 January 2013, the Bank has hedged the possible fair value effects of changes in libor interest rates on 5,375% and 5,875% fixed interest rate debt securities amounting USD 500 million with maturity 5 years and USD 610 million with maturity 7 years funding by using interest rate swaps. USD debt securities issued in total amount to USD 750 million with 5,875% fixed interest rate and maturity 7 years by the Bank. Remaining risk amount to USD 140 million hedged with cross currency swaps in year 2012 but this remaining portion is not subject to fair value hedge accounting. Starting from September 2014, the Bank issued 5% fixed interest rate debt securities with seven years maturity amounting USD 500 million (TL 1.456.600) and they are not subject to fair value hedge accounting.

Also, changes in fair value of USD debt security, issued on February 2016 amounting to USD 500 million with 5 years maturity and 5,375% fixed interest rate, arising from fluctuation in libor interest rates are hedged by applying fair value hedge accounting via currency swap transactions dated February 2016.

Starting from 31 May 2014, the Bank hedged the possible fair value difference risk of CBRT Rediscount loans amount to TL 3.096.608 as of 31 March 2016 related to interest rate changes with forward transactions by using fair value hedge accounting. Changes in the fair value of forward transactions related to TL interest rate risks hedges fair value risk of the TL denominated CBRT Rediscount Loans related to changes in interest rates.

The impact of application fair value hedge accounting is summarised below:

31 March 2016					
Hedging instrument	Asset liability hedging	Risk hedge	Fair value of hedged asset	Net fair value of hedging account	
				Asset	Liability
Interest rate swaps	Fixed interest rate US dollar debt securities	Fixed interest rate risk	22.389	64.606	-
Forward Transactions	Originated CBT-Rediscount TL Loans	Interest rate risk	(1.446)	302	168.751

The Bank evaluates the effectiveness of the hedge accounting at initial date and at every reporting period. Effectiveness test is performed by using “Dollar off-set method”. The Bank continues the hedge accounting if the effectiveness is between 80% and 125%.

Changes in fair values of derivative transactions determined as hedge for fair value are recorded in profit or loss together with changes in hedging asset or liability. The difference in current values of derivative transactions fair value hedge is shown in “Trading gains and losses on derivative financial instruments” account. In the balance sheet, change in fair value of hedge asset or liability during the hedge accounting to be effective is shown with the related asset or liability. If the underlying hedge does not conform to the hedge accounting requirements, according to the adjustments made to the carrying value (amortised cost) of the hedged item, for which the risk is hedged by a portfolio hedge, are amortized with the straight line method within the time to maturity and recognized under the profit and loss accounts.

At the inception date, the Bank documents the relationship between the hedging instruments and hedged items required by the fair value hedge accounting in accordance with TAS 39 and its own risk management policies and principles. Every individual relationship is approved and documented in the same way in accordance with the Bank’s risk management policies. Effectiveness tests were chosen among methods allowed within the context of TAS 39 in accordance with the Bank’s risk management policies. The Bank’s assumptions, which used for determining fair values of derivative instruments, were used while calculating fair value of hedged items on the effectiveness tests. The effectiveness tests are performed and effectiveness of risk relations are measured on a monthly basis. The effectiveness tests are performed rewardingly at the beginning of risk relations. If the underlying hedge does not conform to the accounting requirements (out of 80%-125% effectiveness range) or if the management voluntarily decides to discontinue the hedging relation or the hedging instrument is sold or closed before its maturity, in the context of the fair value hedge, adjustments on the carrying value of the hedged item is reflected on the on “Derivative Financial Transactions Gains/Losses” accounts by using straight line method of amortization.

**II. Currency risk (Continued)**

**2. The scale of the hedging performed through hedge-oriented derivatives for debt instruments in foreign currency and net foreign currency investments (Continued)**

**Cash flow hedge accounting**

Starting from 13 August 2015, the Bank uses “Cash Flow Hedge” accounting.

The impact of application cash flow hedge accounting is summarized below:

	31 March 2016		
	Principal <sup>(1)</sup>	Asset	Liability
<b>Derivative Financial Instruments</b>			
Cross Currency Swap Interest Transactions	92.818	26.436	-
<b>Total</b>	<b>92.818</b>	<b>26.436</b>	<b>-</b>

<sup>(1)</sup> Sum of purchase and sale.

The method of derivatives’ cash flow hedge shown above is explained in Section Three no III accounting policy.

The impact of cash flow hedge accounting is summarized below:

31 March 2016					
Hedging Instrument	Asset liability hedging	Risk Hedge	Fair value of hedged asset	Net fair value of hedging account	
				Asset	Liability
Cross Currency Swap	Fixed interest rate USD debt securities	Currency risk	(287)	26.436	-

At the inception date, the Bank documents the relationship between the hedging instruments and hedged items required by the cash flow hedge accounting application in accordance with TAS 39 and its own risk management policies and principles. Every individual relationship is approved and documented in the same way. In accordance with the Bank’s risk management policies. The effectiveness tests are performed on a monthly basis. If the underlying hedge does not conform to the cash flow hedge accounting requirements (out of 80%-125% effectiveness range) or if the management voluntarily decides to discontinue the hedging relation or the hedging instrument is sold or closed before its maturity, the cumulative gain or loss on the hedging instrument that has been recognized in other comprehensive income from the period when the hedge was effective shall remain separately in equity until the forecast transaction occurs or is no longer expected to occur the net cumulative gain or loss is reclassified from other comprehensive income to profit or loss.

**3. Policy on foreign currency risk management**

The Bank has followed a balanced policy of assets and liabilities with respect to currency risk during the period. As of 31 March 2016, the net foreign Currency Position/Shareholders’ Equity ratio is 17% (31 December 2015: 0,5%). Foreign currency position is followed daily by the type of foreign currency. The Bank monitors the changes in the market conditions and their effect over the activities and positions of the Bank and make decisions in line with the strategies of the Bank.

**4. Approach adopted under internal capital adequacy assessment process for monitoring the adequacy of internal capital for current and future activities**

Fully paid capital by the Treasury of the Turkish Republic Treasury, the Bank’s legal capital is evaluated prospectively, in order to protect capital adequacy under the some stress scenario like rapid and large scale currency and interest rate changes the Bank calculates capital requirement. The Bank both within own group and within the all banking system works with shareholders equity and capital ratio which are above the average. First pillar credit for calculation of legal capital adequacy, adding to market and operational risk, interest rate risk due to second pillar banking calculations and concentration risk are considered.

**SECTION FOUR (Continued)**

**INFORMATION RELATED TO FINANCIAL POSITION AND RISK MANAGEMENT OF THE BANK**  
**(continued)**

**II. Currency risk (Continued)**

**7. Information related to Bank's Currency Risk (continued)**

The effect of the Bank's currency positions as of 31 March 2016 and 31 December 2015 on net profit and equity under the assumption of devaluation of TL against other currencies by 10% with all other variables held constant is as follows:

	Current Period 31.03.2016		Prior Period 31.12.2015	
	Gain/(Loss) Effect	Effect on Equity <sup>(1)</sup>	Gain/(Loss) Effect	Effect on Equity <sup>(1)</sup>
USD	6.317	7.206	7.463	8.601
EUR	1.769	1.769	1.252	1.252
YEN	-	-	-	-
Other foreign currency	164	164	255	255
<b>Total, net</b>	<b>8.250</b>	<b>9.139</b>	<b>8.970</b>	<b>10.108</b>

<sup>(1)</sup> Effect on equity also includes effect on net profit.

As of 31 March 2016 and 31 December 2015, the effect of the appreciation of TL by 10% against other currencies with all other variables held constant on net profit and equity of the Bank is the same as the total amount with a negative sign as presented in the above table.

**III. Interest rate risk**

The Bank estimates the effects of the changes in interest rates over the profitability of the Bank by analyzing TL and foreign currency denominated interest rate sensitive assets and liabilities considering both their interest components as being fixed rate or variable rate and also analyzing their weights among the Bank's total assets and liabilities. Long or short positions (gapping report) arising from interest rate risk are determined by currency types at the related maturity intervals (1 month, 1-3 months, 3-12 months, 1-5 years and over 5 years) as of the period remaining to reprising date, considering the reprising of TL and foreign currency-denominated "interest sensitive" assets and liabilities at maturity date (for fixed rate) or at interest payment dates (for floating rate). By classifying interest sensitive assets and liabilities according to their reprising dates, Bank's exposure to possible variations in market interest rates are determined.

The Bank determines maturity mismatches of assets and liabilities by analyzing the weighted average days to maturity of TL and foreign currency-denominated (for each currency and their USD equivalent) assets and liabilities.

According to the Risk Management Policy approved by the Board of Directors, the Bank emphasizes the matching of foreign currency denominated assets and liabilities with fixed and floating interest rates. The Bank also pays special attention to the level of maturity mismatch of assets and liability with floating and fixed interests in order to restrict negative effects of interest rate changes on the Bank's profitability.

As of 31 March 2016, the Bank has hedged the risk between variable interest rate liabilities and fixed interest rate assets with 23 interest swaps (5 short-term and 18 long-term interest swaps) denominated in USD.

As of 31 March 2016, there have been 15 short-term and 2 long-term FC-FC currency swaps, 1 FC-TL short-term, 1 FC-TL long-term currency swaps and 429 TL-FC forward transactions.

**INFORMATION RELATED TO FINANCIAL POSITION AND RISK MANAGEMENT OF THE BANK**  
**(Continued)**

**IV. Equity position risk arising from banking (Continued)**

**6. Explanation about capital requirements on the basis of stock investments depending upon capital requirements' calculation method which was chosen by the Bank among allowed approaches on "Communique on Calculation of Risk Weighted Exposure Amount for Credit Risk Calculation of the Amount Subject to Credit Risk by Internal-rating Based Approaches".**

There are no stock investments in the banks portfolio. Because of this reason, there is no share position risk arising from banking.

**V. Liquidity risk**

With regard to liquidity risk, banks describes the following aspects.

**a.** The Bank's risk capacity, the BRSA Banks' Liquidity Adequacy Measurement and Assessment of are foreseen in the legal limit. general policy of the Bank's liquidity risk, cost-effective in amounts that can meet the needs of potential cash flow under various operational conditions are based on maintaining a liquidity level. For this purpose, the existing loan stock and move weekly from existing cash balances, including the monthly and annual basis, debt payment obligations, estimated disbursements, credit collections, taking into account the political risk of loss compensation with potential capital inflows Turkish lira and foreign currency denominated cash flow statements are prepared separately and the need for additional resources from the movement and timing of cash flows results are determined. The Bank's cash flow, credit collections and, in terms of additional resources found, it is organized in a way that helps the optimistic neutral and pessimistic scenarios under decision in terms of liquidity management mechanisms. as well as liquidity ratios liquidity management, other balance sheet ratios, liquid assets in the amount and maturity structure and rules relating to the diversification of funding sources are taken into account.

**b.** The Bank's sole shareholder is the Republic of Turkey Undersecretariat of Treasury. Therefore another partnership structure is not available. In terms of liquidity, share of resources that has original maturity longer than 1 year, cannot exceed 20% share in total resources of future repayments.

**c.** The Bank meets its short term liquidity demand from domestic and foreign banks, and long-term liquidity demand from international institutions like the World Bank or Japan Bank for International Cooperation ("JBIC") through medium-long term funds and issued marketable securities and trying to reduce mismatches related to this issue.

**d.** The Bank's main sources of funds denominated in USD and EUR and TL denominated loans are financed with equity and liabilities side in USD and EUR denominated loans to avoid to foreign currency risk in its credit is granted.

**e.** In terms of liquidity, the Bank prefers to use borrowing limits from the Central Bank, Foreign Exchange markets and other domestic and foreign sources only in emergency situations. In addition, due to the status of the bank's investment and development bank to eliminate the risk of sudden absence of deposits and draws are a significant contribution to the reduction of liquidity risk. As well as, finding resources before lending loans and liquidity risk mitigation techniques such as the principle that amortization of external liabilities like syndicated loans before maturity dates are the Bank's fundamental Liquidity Risk mitigation techniques.

**f.** Stress tests of banks' internal systems made by the end of the period. Within the frame of Regulation on Internal Capital Adequacy Assessment Process and BRSA best practice guidelines. Then sent to BRSA at the end of January of the following year. The bank stress test results are also reported to senior management and considered on Banks' domestic decisions.

**g.** The first measure for unexpected liquidity needs that may arise, having more short term assets with a high liquidity rather than short term greater amount of liabilities

In this context:

- Increasing the level of liquid assets and /or
- Trying to extend the maturity of existing debt and / or,
- Limited new loan demand are covered and / or,
- Maturity of the loans be shortened and / or,
- Limits of traded financial institutions are constantly reviewed and / or,
- Part of the securities turn into more liquid form through outright sale or repurchase.

As of 1 January 2014 weekly liquidity coverage ratio application is started with a one year transition period. Until 1 January 2015, there will be no compliance control for proportional limit. Later on 29 December 2014 in accordance with the BRSA and the Central Bank's opinion on the basis of the development and requirements of the liquidity coverage ratio of total minimum investment banks as well as foreign currency would be implemented at zero percent until 2016. Yet the application referred to in the previous sentence, according to the article dated 4 January 2016 from the BRSA will continue until 2017. However, the Bank is subject to liquidity adequacy ratio mentioned in the text of the Regulation on Measurement and Assessment of Liquidity Adequacy of Banks and holds these rates above the legal limits.

In consideration of upper description, Eximbank is subject to relevant application due to its investment and development bank status. Due to Banks' only activity is providing loans for exporters, to more effective usage of its sources, rather than keeping them inactive, offers its sources to exporters use. Eximbank has sufficient sources to keep the liquidity coverage ratio higher than the specified limits both in total or foreign based. However, the alternative cost of this application will show itself as a decline in exports and support to the real economy.

(\*) The average of last three months' liquidity coverage ratio calculated by monthly and weekly simple averages

With regard of the Liquidity Coverage Ratio banks explain the essential issues as follows;

a) Cash inflows and outflows don't have significant fluctuations because Bank is less complex during the period and cash inflows are higher than cash outflows during the period.

b) The Bank's high quality liquid asset stock primarily consists of cash, the accounts held at CBRT and unencumbered government bonds which are issued by Turkish Treasury.

c) Important funding sources of the Bank are funds from CBRT rediscount loans, short-term loans from domestic and overseas banks, medium and long-term funds borrowed from international organizations like World Bank, JBIC and funds obtained from capital market transactions by issuing debt securities.

**(continued)**

**V. Liquidity risk (Continued)**

**2. Liquidity coverage ratio (Continued)**

**d)** The most important items in derivatives held for hedging purposes are forwards for currency risks and swap transactions within the scope of interest rate risk.

**e)** The Banks distribute funding sources between CBRT, domestic banks and international development and investment banks carefully and balanced manner. The Bank's principle to take first quality collaterals like guarantee letters and aval. To prevent concentration risk the bank monitoring the breakdown of the collaterals taken from banks and made policy limit controls for to not take risks up to 20% of each banks' total cash and non-cash loans.

**f)** Taking into account the legal and operational liquidity transfer inhibiting factors, the needed funds and the liquidity risk exposure based on Banks itself, the branches in foreign countries and consolidated partnerships.

None.

**g)** Taken in the calculation of liquidity coverage ratio but not included in the disclosure template in the second paragraph and the information regarding the other cash inflows and cash outflows items which are thought to be related to the Bank's liquidity profile:

None.

Increase Date	Increase Amount	Cash	Issued of income reserves for increasing	Issued of Capital reserves for increasing
-	-	-	-	-

On the General Assembly Meeting dated 22 March 2016, it was decided to that Bank's paid in capital will be increased to TL 3.700.000 and TL 599.657 of the increased TL 1.200.000 amount will be covered by inflation difference, TL 439.790 by the amount transferred to reserves from profit of 2015, TL 160.542 by reserves, TL 11 by undistributed profit of previous year. Based on permission letter of BRSA dated 28 April 2016, capital increase process was completed on 2 May 2016.

**9.2.2. Information on share capital increase from revaluation funds during the current period**

There is not any share capital increase from the revaluation fund during the current period.

**9.2.3. Information on capital commitments, the purpose and the sources until the end of the fiscal year and the subsequent interim period**

Bank has TL 1.200.000 capital commitment and capital increase process continues as of 31 March 2016. The total share capital of the Bank amounting to TL 2.500.000 is fully paid as of report date.

**9.3. The effects of anticipations based on the financial figures for prior periods regarding the Bank's income, profitability and liquidity, and the anticipations regarding the uncertainty of these indicators on the shareholders' equity**

The credit, interest and the foreign currency risk policies of the Bank were determined to minimize the losses that may result from these risks. The Bank aims to obtain a reasonable positive return on equity in real terms in relation with its banking transactions and to protect its equity from the effects of inflation. On the other hand, the proportion of doubtful receivables to the total loans is considered as low and an impairment provision is provided in full for all doubtful receivables. Accordingly, the Bank does not expect losses that may materially affect its equity. In addition, the free capital of the Bank is high and is getting steadily stronger.

(the Turkish member of KPMG International Cooperative, a Swiss entity). The limited review report dated 11 May 2016 has been presented in front of the unconsolidated financial statements.

**II. Explanations and notes prepared by independent auditors**

None.

**SECTION SEVEN**

**I. Interim activity report including reviews of chairman of board of directors and general manager for the six months period ended 31 March 2016.**

Interim activity report prepared as of 31 March 2016 is presented in the appendix.

**TÜRKİYE İHRACAT KREDİ BANKASI A.Ş.'S (TÜRK EXIMBANK)  
INTERIM ACTIVITY REPORT THAT  
HAS BEEN PREPARED AS OF MARCH 31, 2016**

In accordance with the “**Regulation on the Procedures and Principles for Accounting Practices and Retention of Documents by Banks**” that have been published by Banking Regulation and Supervision Agency, our evaluations regarding the interim activity report is as follows.

**World Economy**

Following the gathering strength of the United States of America economy during the year 2015, FED had an interest rate increase on 0,25 points and this situation has reduced a certain amount of the financial fluctuation for the developing economies. On the last quarter of the 2015, United States of America economy had a growing rate of 1,4% and therefore within the year 2015 the total growth performance is 2%. On the other hand it has been foreseen that in the year 2016 FED will have a gradual approach on the interest rate increase. Slow process rate of the interest increase will state value loss to the Dollar and this can be evaluated as a positive signal both for United States of America inflation and the contribution of the exportation to the growth. In addition, relatively positive increase of the oil prices will positively affect the inflation in United States of America while also having a positive influence on oil-intensive states in terms of employment.

Euro Zone, the biggest trading partner of Turkey has increased growth rate since the second quarter of the year 2014. Especially, European Central Bank (Hereinafter shall be referred as “ECB”) has applied monetary development policies and as a result the increase has been accelerated and during the year 2015, Euro Zone has grown approximately 1,6. On the other hand, since the monetary development increased from 60 Billion Euro to 80 Billion Euro and the negative interest rates were reduced even more, the concerns regarding the deflation of Euro Zone again on February on the year 2016. Another risk element regarding the Euro Zone can be stated as the increasing immigrant problem and the global terrorist acts.

The greatest driving force of the global growth, China, has the lowest growth rate of 25 years in the year 2015 and realized as 6,9%. In addition, the quite powerful increase that have been occurred at the share stock market after new year and the following hard fall and the various precautions that have been executed by different means and vehicles by the state to prevent this fall did not help the achievement of the targeted success and therefore the concerns on the financial markets have been increased.

Regression of the growth performances resulted as the downward movement of the commodity prices. This condition has been evaluated as a risk element by the commodity exporter companies and it is also stating that the global economy is not be able to achieve the pre-crisis period yet. Aside from the inability of the recovery of the global economy, adding the constantly increasing company debts and the disruption of the income distribution to the table, makes the global risks more evident.

**Economy of Turkey**

Economy of Turkey has been subjected to growth beyond considerable expectations with 5,7% at the last quarter of the year 2015 and during the year 2015 the total growth rate is 4%. Looking at the year in general, it can be seen that the main driving element is the private consumption expenses (3 percent) while the public expenses are providing a contribution of 1,1 percent to the growth in total. In addition, net importation contribution on growth is negative (0,3 percent) and 0,5% of positive contribution by the investment can be seen as development. In the end of the year 2014 on US Dollar basis, 798,5 Billion GDP, is ended up 719 Billion US Dollars in the year 2015 because of the high value increase of US Dollar against Turkish Lira. On the other hand, budget deficit ratio to the GDP has been reduced to 1,3% on the year 2014 and 1,2% on the year 2015 and within the same period of time current account deficit to the national income has been reduced to 5,8% to 4,5%. The increase request on the minimum wage amount can be seen as an element to increase the internal demand and during the first quarter of the year 2016 it has been evaluated that an increase arising from the internal demand will be realized.

As of February 2016, the annual export rate has been reduced by 9,8% for 141,3 Billion US Dollars and the importation rate has been reduced by 14,9% for 202,6 Billion US Dollars level and therefore the foreign commerce deficit has been reduced by 24,8% to the 61,3 Billion US Dollars level.

### **Economy of Turkey (Continued)**

However, in order to follow up with the foreign exchange balance, the foreign commerce registration system may cause some misunderstandings during the evaluation of the actual performance. The downward movement of the Euro/Dollar parity, especially during the period of time of recording the exportations that have been executed to the European Union, which is our most important exportation market of the regions that are subjected to exportation by Euro type, has been converted to US Dollars and therefore the actual performance can be hidden because of the abovementioned operation. In other words, US Dollar equivalent of the exportation that has been executed by Euro to the European Union is reducing with the reducing of the Euro/Dollar parity. Therefore, because of this reason in order to follow up with the exportation performance and to correctly analyze the contribution of the foreign commerce to the development, the trade activity numbers should be separated from the parity movements to following up the activities and execution of this operation is quite important.

However, as of the month February of the year 2016, the annual Euro/Dollar parity has negative contribution of 6,5 points. However, in accordance with the exchange units, the exportation data should be cleaned from the effects of Euro/Dollar parity and should be evaluated carefully. After the evaluation it can be seen that the European Union exportation by Turkey has a positive performance and the steady increase is continuing. It has been estimated that the positive contribution of the exportation that have been executed with Euro currency has 4,3% rate. In other words, the markets that are reducing the exportation performance of Turkey are mainly the markets that are being subjected to commerce with the US Dollar exchange. In these markets, the main reason of the decrease on the exportation is the negative performance on the Russia and Iraq markets. As of February, the negative contribution of the Russia and Iraq Markets annually is the 3%.

As of December 2014, the budget deficit was about 46,5 Billion US Dollars and during the entire year of 2015 it has been reduced to 32,2 Billion US Dollars. As of February 2016, the annual budget deficit is about 30,5 Billion US Dollars and the momentum has been confirmed for the decrease on the budget deficit. As of February 2016, net capital inflow has been reduced to 9 Billion US Dollars annually. Therefore, the reserve decrease on 14 Billion US Dollars on the budget deficit and net errors and emissions unit amounting to 7,4 Billion US Dollars has been financed. Consumer prices has continued maintaining its upward movement on the second half of the year 2015 and on January 2016 it has reached 9,6% with its highest point. The precautions that have been taken for the food prices has been entered into force and the inflation has decreased acutely and as of March 2016 it has been realized as 7,4%. In the recent months the slowness has been caused because of the foreign exchange rate fluctuation and it has been evaluated that the downwards movement can be contributed with such operations.

### **Türk Eximbank continues to provide credits in cash and insurance support**

As of March 31, 2016 the credits that have been provided by Türk Eximbank for exportation industry has increased 25% considering the period of the previous year and exceeded 16 Billion US Dollars. 10,4 Billion US Dollar of such credits is consisting of short maturity and 5,7 Billion US Dollars of such credits is consisting of are medium – long maturity within the country and buyer credits. Companies that are benefiting from the credits from the Bank for the first quarter of the year 2016 is 3.226 and 73% of these companies are SME's.

Exporters had applied to the Rediscount Credits that are being used as an important financing resource in the recent period in a high demand and this high demand continued during the first quarter of the year 2016. Within this period, in accordance with the scope of the Rediscount Credits, 3,8 Billion US Dollars' worth of credits has been used and as of March 31, 016, Rediscount Credits has 83% rate level on the short maturity exportation credits of our Bank.

On the other hand, within the scope of the exportation credits insurance programs, in the first quarter of the year 2016, considering the same period of the last year increased 2% and transfer insurance amounting to 2,6 Billion US Dollars has been incorporated. Total premium amount that have been collected during this period is realized as 8 Million US Dollars. Active buyer numbers in accordance with the allocated limit within the insurance programs are approximately at 44 thousand.

In accordance with the international credit/warranty programs between the January – March 2016 period, 113 Million US Dollars' worth of credit has been used. 86 Million US Dollars part of this amount were being used within the context of Ethiopia Awash – Woldia Railroad Project.

**Türk Eximbank continues to provide credits in cash and insurance support (Continued)**

In addition within the context of drinking water project in Gana 16,4 Million US Dollars were being used initially and for the Conference Center Project of Senegal 3,2 Million Euro were being used and usages regarding projects amounting to 48,5 Million Euro has been completed.

As Türk Eximbank during the January – March 2016 period from the foreign credit and capital markets a total of 1,7 Billion US Dollars resource were acquired and 785 Million US Dollars of repayment were being executed.

**Explanations regarding the Balance Sheet and Income Table units of Türk Eximbank**

As of May 31, 2016 the balance sheet size of Türk Eximbank is exceeding 48,5 Billion Turkish Liras (17,1 Billion US Dollars).

Assets of Türk Eximbank is consisting of the following items; 94% coming from credits, 3% coming from liquidated assets, 3% is securities held to maturity and other assets.

Budget of the credits that are being used by the Bank has been realized as 45,6 Billion Turkish Liras. These credits have an increase rate of 6% considering the end of the previous year. 29,5 Billion Turkish Liras that are consisting of 65% of the total credits are belonging to short maturity credits, 16,1 Billion Turkish Liras that are consisting of 35% of the total credits are belonging to medium – long maturity credits. With the effective risk evaluation methods that have been followed, Türk Eximbank provides extensive effort to collect the claimable on time and in full. However, even if the a significantly important part of the resources of the Bank is being provided for the exportation industry services as credit, the claimable with default ratio to the total credits is 0,3% and it is far below of the industry average.

Total liabilities of Türk Eximbank amounting to 48,5 Billion Turkish Liras are divided as follows; 10% amounting to 4,9 Billion Turkish Liras from equity, 87% amounting to 42 Billion Turkish Liras from other borrowings, 3% amounting to 1,7 Billion Turkish Liras is from provisions and other liabilities.

Equity that is amounting to 4,8 Billion Turkish Liras are divided as follows; 51% amounting to 2,5 Billion Turkish Liras as paid-in capital, 47% amounting to 2,2 Billion Turkish Liras as capital and profit reserves and 2% amounting to 110 Million Turkish Liras as net profit of the period.

42 Million Turkish Liras that have been used for the funding of the assets has used been used from external resources as 23.891 Million Turkish Liras from credits arising from Republic of Turkey Center Bank credits, 6.426 Million Turkish Liras from securities issued, 7.188 Million Turkish liras used from foreign and domestic banks, 4.181 Million Turkish liras from syndication credits, 118 Million Turkish Liras from subordinated loans and 220 Million Turkish Liras from repurchase agreements.

As of March 31, 2016 nominal capital of the Bank is 2,5 Billion Turkish Liras and all of the capital has been paid.

However, in accordance with the article 13 of the “Regulation on Procedures and Principles for Determination of Qualifications of Loans and Other Receivables by Banks and Provisions to be Set Aside” titled Exceptions, for the operations of the Bank in accordance with the Establishment Law, private and general provisions to be set aside has considered at zero percent, however Türk Eximbank is making provisions in accordance with the prudent banking principles.

For the liquid assets including the short term credits by Türk Eximbank the return rate is 104% as of March 31, 2016.

**Explanations regarding the Balance Sheet and Income Table units of Türk Eximbank (Continued)**

Since the balance sheet of the Türk Eximbank is leaning on the credits, the effect of such operations shows itself on the incomes. The total interest income of the Bank is 338 Million Turkish Liras and 94% of this income amounting to 318 Million Turkish Liras is arising from the interests that are being collected from the credits. On the other hand, since the Bank is providing resources by acquiring debt from domestic, international money and capital markets and bond issuance, the interest expenses are 143 Million Turkish Liras and 54% amounting to 77 Million Turkish Liras is arising from interests paid for securities issued and 43% amounting to 61 Million Turkish Liras is arising from interests paid for credits used from domestic and international banks and 3% amounting to 5 Million Turkish Liras from other interest expenses and the net interest income is 195 Million Turkish Liras.

Net profit of the Bank has been realized as 110 Million Turkish Liras as of March 31, 2016 and therefore return on assets of the Bank is 0,2% and return on equity of the Bank has been realized as 2,2%.

In accordance with the article 37 of the Banking Law numbered 5411 and Regulation on the Procedures and Principles for Accounting Practices and Retention of Documents by Banks dated November 11, 2006 and published at Official Gazette with the number of 26333 and any other regulation, communiqué or circulars that have been published Turkish Accounting Standards and Turkish Financial reporting Standards and Banking Regulation and Supervision Agency (Hereinafter shall be referred as “BRSA”) and explanations of BRSA; our Bank has prepared the financial tables in accordance with the accounting registrations and independent audit firm titled Akis Bağımsız Denetim ve Serbest Muhasebeci Mali Müşavirlik A.Ş. (KPMG) has been prepared the ultimate report without any critics while being subjected to audit in accordance with the International Audit Standards.

The Bank is executing its operations in accordance with the applicable legislation and the provisions of the Articles of Association of the Company and we kindly submit our summary report regarding the financial tables as of accounting period that have been concluded as March 31, 2016 to your side.
